Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Amendment B, filed on 02 May 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Amendment B, filed on 02 May 2003, has been considered and entered.

Amendment of specification overcomes the objection to the disclosure.

Amendments of claims 1-6 overcome the objection of claims 1-6.

Claim 7 is cancelled.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Swank (US 5233432).

Regarding claim 1, Swank discloses an implosion prevention tension band (134 of Fig 3) for a cathode ray tube (10, Fig 1) having an evacuated envelope (15) including a faceplate with a substantially flat viewing area (18), extending to a peripheral rearwardly extending side wall (20) and forming an inside blend radius at the corner from the viewing faceplate (18) to the side wall (20), the side wall having corners with a given radius of curvature (Fig 1, Fig 3), the tension band (134 of Fig 3) comprising a band surrounding the faceplate panel having a width extending rearwardly from near the viewing faceplate (18) to at least half the distance between a rear edge of inside blend radius to rear edge of the side wall (21 of Fig 1) and a plurality of tension adjusting features (overlapping portions 136, and openings 150, lines 9-18 of column 4) formed in a rear section of the tension band (134) aft of the inside blend radius (Fig 3).

Regarding claim 2, Swank discloses that the plurality of tension adjusting features comprise at least one aperture (opening 150) extending through the tension band (Fig 3).

Regarding claim 3, Swank discloses that the plurality of the tension adjusting features (150, or 250) is positioned at locations near the corners of the tension band (lines 22-23 of column 4).

Regarding claim 5, Swank discloses that the plurality of the tension adjusting features comprise a dimple formed in the tension band (Fig 5).

Allowable Subject Matter

Claims 4 & 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 4, the prior art of record neither teaches nor suggests an implosion prevention tension band for a CRT having all the claimed limitations, particularly the limitation of tension adjusting features comprising semicircular apertures.

Regarding claim 6, the prior art of record neither shows nor suggests an implosion prevention band further comprising mounting lugs fixed at corners wherein the plurality of tension adjusting features are located near corner of the band on opposite sides of the mounting lugs.

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
